DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-4,6-10,13,15-19, drawn to detecting an error in control signaling transmitted over a reverse link when traffic channels are not being communicated in the reverse link, classified in class 370, subclass 318.
 - II. Claims 20-24,26, 28, 30-32, 37-38, drawn to detecting an error in the received control signaling when the mobile unit is in the discontinuous transmission mode, classified in class 455, subclass 522.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as detecting an error in control signaling transmitted over a reverse link when traffic channels are not being communicated in the reverse link. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Dan C Hu on 10/28/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2681

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Q. Nguyen whose telephone number is 571-272-7844. The examiner can normally be reached on 8:30AM-5:30PM.
